VERIQTA

20 Real Resumes That Got Interviews:

DevOps, SRE, Cloud & Platform

- 16 Real-World Role Resumes
- Proven Formats
- Expert Annotations
- Ready-to-Use Template

Build a Professional, Evidence-Based Resume and Get Interviewed.

@veriqta | @veriqta | @veriqta | @veriqta | @veriqta | @veriqta

How to Use This Book

1. Choose the resume closest to your target engineering role.

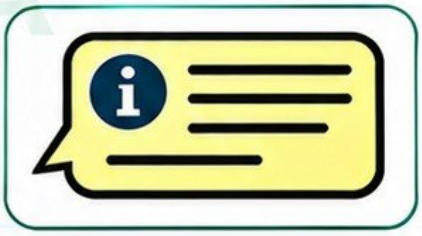

2. Study its structure, technical evidence, achievements, and formatting.

3. Adapt the structure to your actual experience. Never copy claims you cannot verify.

4. Understand the margin annotations explaining why specific resume bullets work.

5. Learn how to present projects, certifications, technical ownership, and measurable outcomes.

Key Outcome: Build a clear, credible, and interview-ready engineering resume based on real, proven examples.

DevOps Fresher – Sample Resume

No Job Experience | Projects, Labs and GitHub as Evidence

JORDAN REED
Aspiring DevOps Engineer

jordan.reed@example.com
+1 (512) 555-0147
Austin, TX, United States | Open to Remote
github.com/jordanreed-devops
linkedin.com/in/jordanreed-devops

PROFESSIONAL SUMMARY

Aspiring DevOps Engineer with hands-on experience in Linux, automation, CI/CD, containers, Kubernates and AWS through real-world projects and labs. Passionate about building reliable, secure and scalable systems, and ready to contribute to a production-focused engineering team.

TECHNICAL SKILLS

Operating Systems: Linux (Ubuntu, Rocky), macOS
Scripting: Bash, Python
Containers & Orchestration: Docker, Kubernetes
CI/CD: GitHub Actions, Jenkins (basics)
Infrastructure as Code: Terraform
Cloud: AWS (EC2, S3, IAM, VPC, EKS – basics)
Monitoring & Observability: Prometheus, Grafana
Version Control: Git, GitHub
Other Tools: Nginx, systemd, Helm (basics), VS Code

PROJECTS (KEY EVIDENCE)

1 CI/CD Pipeline for a Web Application
- Built a full CI/CD pipeline with GitHub Actions to test, build and deploy a containerized web app to an AWS EC2 instance.
- **Tech:** GitHub Actions, Docker, EC2, Nginx
- **Result:** Automated deployments and reduced release time by ~80%.

2 Kubernetes Deployment on AWS EKS
- Containerized a sample application and deployed it to AWS EKS with rolling updates and auto-scaling.
- **Tech:** Docker, Kubernetes, EKS, Helm
- **Result:** Achieved a highly available setup with zero-downtime updates.

3 Infrastructure as Code with Terraform
- Provisioned a complete AWS environment (VPC, EC2, S3, IAM) using Terraform with reusable modules.
- **Tech:** Terraform, AWS
- **Result:** Reproducible infrastructure in under 10 minutes.

ADDITIONAL HANDS-ON WORK

- Completed 10+ labs: Linux operations, shell scripting, Docker, Kubernetes, AWS and monitoring.
- Documented projects with setup guides, diagrams and commands on GitHub.
- Practiced incident troubleshooting and log analysis in a lab environment.

EDUCATION

BSc in Computer Science | State University (US) | 2024

CERTIFICATIONS & LEARNING

- AWS Cloud Practitioner (Completed)
- Docker, Kubernetes and Terraform (Hands-on, Project Based)

Why This Resume Works

- Strong project evidence that shows real skills.
- Clear, relevant technical skills for a DevOps role.
- Measurable results (e.g., 80% faster releases, zero downtime).

Project Evidence

GitHub: github.com/jordanreed-devops

- Source code and IaC files
- Deployment and setup guides
- Architecture diagrams
- Hands-on lab exercises

Target Roles

- DevOps Engineer (Entry Level)
- Cloud Engineer (Entry Level)
- SRE (Entry Level)
- Platform Engineer (Junior)

Junior DevOps Engineer – Sample Resume

1–2 Years Experience | First Real Job with Measurable Wins

TAYLOR MORGAN
Junior DevOps Engineer

taylor.morgan@example.com
+1 (415) 555-7823
San Francisco, CA, United States | Open to Remote
github.com/taylormorgan-devops
linkedin.com/in/taylormorgan-devops

PROFESSIONAL SUMMARY

Junior DevOps Engineer with 1+ year of hands-on experience building and maintaining CI/CD pipelines, containerized applications, and cloud infrastructure on AWS. Focused on automation, reliability, and continuous improvement. Passionate about delivering stable, scalable, and secure systems.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, ECR, IAM, CloudWatch)
Containers & Orchestration: Docker, Kubernetes (basics)
CI/CD: GitHub Actions, Jenkins
Infrastructure as Code: Terraform
Scripting: Bash, Python
Monitoring & Observability: Prometheus, Grafana
Version Control: Git, GitHub
Other Tools: Nginx, Linux, VS Code

PROFESSIONAL EXPERIENCE

Junior DevOps Engineer
CloudWave Technologies, Inc.
Jun 2023 – Present
San Francisco, CA (Hybrid)

- Built and maintained CI/CD pipelines with GitHub Actions, reducing deployment time by 60% (from 25 minutes to 10 minutes).
- Containerized legacy services with Docker and deployed to AWS ECS, improving release consistency and reducing deployment issues by 75%.
- Automated infrastructure provisioning with Terraform for dev and staging environments, cutting setup time from 4 hours to 30 minutes.
- Implemented monitoring and alerting with Prometheus and Grafana, reducing mean time to detect (MTTD) incidents by 50%.
- Resolved production issues and collaborated with the engineering team to improve system reliability and uptime to 99.9%.

PROJECTS

1 E-Commerce CI/CD Pipeline
- End-to-end pipeline with GitHub Actions, Docker and AWS ECS.
- Automated tests, build and deployment on every commit.

2 Infrastructure as Code – AWS
- Provisioned VPC, EC2, RDS and S3 using Terraform.
- Modular, reusable code with environment separation (dev/staging).

EDUCATION

BSc in Computer Science | University of California | 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Docker Foundations

Why This Resume Works

- Real job experience with clear, quantified impact.
- Shows ownership of CI/CD, containers and cloud.
- Uses measurable results (e.g., 60% faster, 75% fewer issues, 99.9% uptime).

Key Impact (At a Glance)

- 60% faster deployments
- 75% fewer deployment issues
- 50% faster incident detection
- 99.9% system uptime

Target Roles

- Junior DevOps Engineer
- DevOps Engineer (Entry Level)
- Cloud Engineer (Junior)
- Platform Engineer (Junior)
- SRE (Entry Level)

VERIQTA

Mid-Level DevOps Engineer – Sample Resume

3–5 Years Experience | Owns CI/CD and One Cloud End to End

JORDAN PARKER
DevOps Engineer

jordan.parker@example.com
+1 (512) 555-9842
Austin, TX, United States | Open to Remote
github.com/jordanparker-devops
linkedin.com/in/jordanparker-devops

PROFESSIONAL SUMMARY

DevOps Engineer with 4 years of experience owning end-to-end CI/CD, cloud infrastructure, and production operations on AWS. Skilled in automation, containerization, observability, and reliability engineering. Proven record of improving deployment speed, system stability, and cloud cost efficiency.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, EKS, ECS, S3, RDS, IAM, VPC, CloudWatch)
- **CI/CD:** GitHub Actions, Jenkins, Argo CD
- **Containers & Orchestration:** Docker, Kubernetes (EKS)
- **Infrastructure as Code:** Terraform
- **Monitoring & Observability:** Prometheus, Grafana, CloudWatch
- **Scripting:** Python, Bash
- **Version Control:** Git, GitHub
- **Other Tools:** Nginx, Linux, Helm

PROFESSIONAL EXPERIENCE

DevOps Engineer | **Feb 2021 – Present**
CloudScale Solutions, Inc. | Austin, TX, United States (Hybrid)

- Owned the end-to-end CI/CD pipeline for multiple services using GitHub Actions and Argo CD, reducing deployment time by 70%.
- Built and managed AWS infrastructure with Terraform, including VPC, EKS, RDS, and S3, supporting a high-availability setup (99.95%+).
- Containerized legacy applications with Docker and migrated to Kubernetes (EKS), improving scalability and resource utlization by 50%.
- Implemented centralized monitoring with Prometheus and Grafana, reducing incident MTTR from 45 minutes to 12 minutes.
- Optimized cloud costs through right-sizing and auto-scaling, lowering monthly spend by 30%.

PROJECTS

1 Production CI/CD Platform
- Implemented a reusable CI/CD framework with GitHub Actions and Argo CD for multiple microservices.

2 Scalable EKS Deployment on AWS
- Designed and deployed a highly available EKS cluster with auto-scaling, monitoring, and centralized logging.

EDUCATION

BSc in Computer Science | State University (US) | 2019

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- CKA: Certified Kubernetes Administrator

Key Achievements

- Reduced deployment time by 70%.
- Improved system uptime to 99.95%+.
- Lowered AWS costs by 30%.
- Cut incident MTTR from 45 to 12 minutes.

Cloud Ownership (AWS)

- Compute: EC2, EKS, ECS
- Storage: S3, EBS
- Database: RDS
- Networking: VPC, Subnets, ALB
- Security: IAM, Security Groups
- Observability: CloudWatch

Target Roles

- DevOps Engineer (Mid-Level)
- Cloud Engineer
- Platform Engineer
- SRE (Mid-Level)
- Infrastructure Engineer

VERIQTA

Senior DevOps Engineer – Sample Resume

6+ Years Experience | Platforms, Scale and Measurable Impact

CHRIS FOSTER
Senior DevOps Engineer

chris.foster@cloudexample.com
+1 (628) 555-4210
Seattle, WA, United States | Open to Remote
github.com/chrisfoster-devops
linkedin.com/in/chrisfoster-devops

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 6+ years of experience designing, building and operating scalable, secure and highly available platforms on AWS. Expert in CI/CD, Kubernetes, infrastructure as code and observability, with a strong record of improving reliability, performance and cost efficiency at scale.

TECHNICAL SKILLS

- **Cloud:** AWS (EKS, EC2, S3, RDS, IAM, VPC, CloudWatch, Lambda)
- **CI/CD:** GitHub Actions, Jenkins, Argo CD
- **Containers & Orchestration:** Docker, Kubernetes (EKS)
- **Infrastructure as Code:** Terraform, CloudFormation
- **Monitoring & Observability:** Prometheus, Grafana, Datadog
- **Scripting & Automation:** Python, Bash, Go (basic)
- **Security & Compliance:** IAM, Secrets Manager, KMS, SAST/DAST
- **Other Tools:** Nginx, Linux, Helm, Apache, Git

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | **Jan 2021 – Present**
CloudEdge Systems, Inc. | Seattle, WA, United States (Hybrid)

- Led the design and operation of a multi-region Kubernetes platform (EKS) serving 50+ microservices and 10M+ monthly users.
- Rebuilt the CI/CD platform with GitHub Actions and Argo CD, reducing deployment time by 85% (from 40 minutes to 6 minutes).
- Implemented observability (Prometheus, Grafana, Datadog) with SLOs and alerting, improving system uptime from 99.90% to 99.99%.
- Optimized AWS infrastructure (compute, storage, and networking), reducing monthly cloud costs by 35% (~$86K/year).
- Established infrastructure as code with Terraform, enabling consistent, repeatable and secure environments across dev, staging and production.

DevOps Engineer | **Jun 2018 – Dec 2020**
Nimbus Tech, LLC | Austin, TX, United States

- Built and maintained CI/CD pipelines, containerized applications and managed AWS infrastructure (EC2, RDS, S3, ELB).
- Automated deployment and recovery processes, reducing incident MTTR by 60% (from 50 minutes to 20 minutes).
- Introduced centralized logging and monitoring, improving issue detection and resolution.

EDUCATION

BSc in Computer Science | State University (US) | 2017

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Administrator (CKA)
- HashiCorp Terraform Associate

Key Achievements

- 99.99% platform uptime across production.
- 85% faster deployments (40 min → 6 min).
- 35% lower cloud costs (~$86K/year).
- 60% faster incident recovery (MTTR).

Scale & Ownership

- 50+ microservices
- 10M+ monthly users
- Multi-region AWS (EKS)
- End-to-end CI/CD & IaC
- Observability, SLOs & reliability

Target Roles

- Senior DevOps Engineer
- Platform Engineer (Senior)
- SRE (Senior)
- Cloud Engineer (Senior)
- Infrastructure Engineer (Senior)

DevOps Team Lead - Sample Resume

Technical Leadership | Team Management | Delivery at Scale

MORGAN RIVERS

DevOps Team Lead

morgan.rivers@example.com
+1 (617) 555-9034
Boston, MA, United States | Open to Remote
github.com/mrivers-devops
linkedin.com/in/morganrivers-devops

PROFESSIONAL SUMMARY

DevOps Team Lead with 8+ years in DevOps and cloud engineering, leading high-performing teams to design, build and operate scalable, secure and cost-efficient platforms on AWS. Proven record of delivering reliable systems, driving automation, mentoring engineers and aligning technology roadmaps with business goals.

TECHNICAL SKILLS

- **Cloud:** AWS (EKS, EC2, S3, RDS, IAM, VPC, CloudWatch, Lambda)
- **CI/CD:** GitHub Actions, Jenkins, Argo CD, GitLab CI
- **Containers & Orchestration:** Docker, Kubernetes (EKS)
- **Infrastructure as Code:** Terraform, CloudFormation
- **Observability:** Prometheus, Grafana, Datadog, ELK
- **Security:** IAM, KMS, Secrets Manager, SAST/DAST
- **Other:** Linux, Python, Bash, Helm, Nginx, Git

PROFESSIONAL EXPERIENCE

DevOps Team Lead
CloudBridge Solutions, Inc. | Mar 2022 – Present | Boston, MA, United States (Hybrid)

- Lead a team of 6 DevOps engineers, delivering platform, CI/CD and infrastructure initiatives for 15+ production services.
- Defined and executed a 12-month DevOps roadmap, improving deployment frequency by 5× and reducing lead time from 2 days to 4 hours.
- Standardized platform tooling (Terraform, EKS, Argo CD) and created reusable golden paths, increasing developer productivity by 40%.
- Reduced cloud infrastructure costs by 30% (~$120K/year) through right-sizing, automation and resource governance.
- Led hiring (3 engineers), onboarding and mentorship, with a focus on skill growth, reliability and operational excellence.

Senior DevOps Engineer
Northridge Tech, LLC | Jun 2018 – Feb 2022 | Austin, TX, United States

- Designed and maintained CI/CD pipelines and Kubernetes platforms (EKS) for multiple products, improving release reliability to 99.95%.
- Implemented observability and incident response, reducing MTTR by 60%.
- Automated infrastructure provisioning with Terraform, cutting setup time from hours to minutes.

EDUCATION

BSc in Computer Science | State University (US) | 2015

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Administrator (CKA)
- HashiCorp Terraform Associate

Key Achievements

- Led and grew a DevOps team (6 engineers).
- 5× faster deployments (2 days → 4 hours).
- 30% lower cloud costs (~$120K/year).
- 99.95% platform uptime across 15+ services.

Leadership & Roadmap

- Defined and delivered a 12-month DevOps roadmap.
- Built reusable platform golden paths.
- Drove automation, reliability and cost efficiency at scale.
- Aligned platform work with business and product goals.

Target Roles

- DevOps Team Lead
- Platform Engineering Lead
- Cloud Engineering Lead
- DevOps Manager
- Infrastructure Engineering Lead

VERIQTA

Junior SRE – Sample Resume

From Support/System Admin Roots | Reliability and Operations

ALEX CARTER
Junior Site Reliability Engineer

alex.carter@example.com
+1 (206) 555-4792
Seattle, WA, United States | Open to Remote
github.com/alexcarter-sre
linkedin.com/in/alexcarter-sre

PROFESSIONAL SUMMARY

Junior SRE with 2+ years of experience in system administration and production support, transitioning into reliability engineering. Skilled in Linux, cloud operations, monitoring, incident response and automation. Focused on improving system reliability, availability and performance through observability, SLOs and automation.

TECHNICAL SKILLS

- **Reliability:** SLOs, SLIs, Error Budgets, MTTR, Incident Management
- **Monitoring:** Prometheus, Grafana, Alertmanager, ELK
- **Cloud:** AWS (EC2, EKS, S3, CloudWatch, IAM)
- **Automation:** Bash, Python (scripting), Ansible
- **Infrastructure as Code:** Terraform (basics)
- **Containers & Orchestration:** Docker, Kubernetes (basics)
- **OS & Administration:** Linux (RHEL/Ubuntu), systemd, networking
- **Other Tools:** Git, GitHub, Jira, Confluence

PROFESSIONAL EXPERIENCE

Technical Support / Systems Administrator | **Jun 2023 – Present**
BlueCloud Services, Inc. | Seattle, WA, United States (Hybrid)

- Supported and maintained Linux servers and production applications for a high-traffic platform (99.9%+ availability).
- Implemented monitoring and alerting with Prometheus and Grafana, improving incident detection by 60%.
- Automated routine operations (user provisioning, log cleanup, backups) with Bash and Python, saving ~5 hours per week.
- Participated in incident response and post-incident reviews (RCA), reducing MTTR from 45 minutes to 18 minutes.

IT Support Analyst | **Mar 2022 – May 2023**
PineTech Solutions | Bellevue, WA, United States

- Provided L1/L2 support for infrastructure, applications and user issues.
- Assisted with system patching, backups and access management (IAM).
- Helped onboard monitoring and log aggregation (ELK) for production services.

PROJECTS

1. **SRE Observability Stack on AWS**
   - Deployed a monitoring stack (Prometheus, Grafana, Alertmanager) on AWS EKS with alerts, dashboards and SLO tracking.
2. **Incident Response Runbook & Automation**
   - Built an automated incident response workflow (Bash + Slack alerts) and a reusable runbook with RCA and post-incident templates.

EDUCATION

BSc in Information Technology | State University (US) | 2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Linux Professional Institute (LPIC-1) – or Red Hat System Administrator (RHCSA)

Key Achievements

- Improved incident detection by 60%.
- Reduced MTTR from 45 minutes to 18 minutes.
- Maintained 99.9%+ service availability.
- Automated ops tasks, saving ~5 hours per week.

SRE Focus Areas

- Reliability Engineering (SLO/SLI)
- Monitoring & Observability
- Incident Management & RCA
- Automation & Operational Excellence
- System Performance & Availability

Tools in Action

- Prometheus / Grafana
- AWS (EC2, EKS, CloudWatch)
- Docker / Kubernetes
- Terraform / Ansible
- Linux / systemd
- Bash / Python

Target Roles

- Site Reliability Engineer (Junior)
- SRE (Entry–Mid Level)
- Platform Reliability Engineer
- Production Support Engineer

Mid-Level SRE – Sample Resume

Site Reliability Engineering | SLOs | Error Budgets | Incident Management

JORDAN REED

Site Reliability Engineer

jordan.reed@example.com
+1 (425) 555-7310
Bellevue, WA, United States | Open to Remote
github.com/jordanreed-sre
linkedin.com/in/jordanreed-sre

PROFESSIONAL SUMMARY

Site Reliability Engineer with 4+ years of experience building and operating highly available, scalable and observable systems. Experienced in defining and managing SLOs and error budgets, leading incident response, and driving reliability improvements through automation, monitoring and capacity planning.

TECHNICAL SKILLS

- **Reliability:** SLOs, SLIs, Error Budgets, Postmortems (RCA)
- **Monitoring:** Prometheus, Grafana, Alertmanager, Datadog
- **Cloud:** AWS (EKS, EC2, S3, RDS, Lambda), GCP (basic)
- **Automation:** Terraform, Ansible, Python, Bash
- **Containers:** Docker, Kubernetes (EKS), Helm
- **Incident Management:** PagerDuty, Opsgenie, Slack
- **Other:** Linux, Git, CI/CD (GitHub Actions), ELK

PROFESSIONAL EXPERIENCE

Site Reliability Engineer
CloudScale Technologies, Inc. | Mar 2022 – Present | Bellevue, WA, United States (Hybrid)

- Defined and managed SLOs for 10+ production services (e.g., 99.95% availability, <300 ms p95 latency) with formal error budgets.
- Reduced sev-1/2 incident volume by 60% and MTTR from 52 minutes to 16 minutes through improved alerting, runbooks and automation.
- Led reliability improvements that increased overall service availability from 99.90% to 99.99%.
- Implemented auto-scaling and capacity planning, handling 4× traffic growth during peak events without incidents.

DevOps Engineer
Nimbus Systems, LLC | Jul 2020 – Feb 2022 | Austin, TX, United States

- Built and maintained CI/CD pipelines and Kubernetes workloads (EKS).
- Added proactive monitoring (Prometheus + Grafana), reducing incident detection time by 70%.
- Automated infrastructure provisioning with Terraform, improving environment setup time from hours to minutes.

KEY PROJECTS

1 Reliability Program (SLOs + Error Budgets)
- Implemented SLOs, error budgets and service scorecards for critical services, improving reliability and release confidence.

2 Incident Automation & Runbooks
- Built automated incident response (PagerDuty + Slack) and standardized runbooks, reducing MTTR by 69% (52 min → 16 min).

EDUCATION

BSc in Computer Science | State University (US) | 2019

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Administrator (CKA)
- Google SRE Professional Certificate

Key Achievements

- 99.99% service availability (up from 99.90%).
- 60% reduction in sev-1/2 incidents.
- MTTR: 52 min → 16 min (–69%).
- Managed SLOs & error budgets for 10+ services.

Reliability Metrics

- SLO (Availability): 99.95%
- SLO (Latency p95): <300 ms
- Error Budget: 0.05% (≈ 21.6 min/month)
- Incident Volume: –60%
- MTTR: 16 minutes
- Change Failure Rate: 3% (↓ from 8%)

Target Roles

- Site Reliability Engineer (Mid-Level)
- SRE (III)
- Reliability Engineer
- Platform SRE
- Production Support (SRE)

VERIQTA

Senior SRE – Sample Resume

Systems-Level Impact | Postmortems | Toil Cut in Half

ALEX FOSTER
Senior Site Reliability Engineer

alex.foster@example.com
+1 (617) 555-7642
Seattle, WA, United States | Open to Remote
github.com/alexfoster-sre
linkedin.com/in/alexfoster-sre

PROFESSIONAL SUMMARY

Senior SRE with 7+ years of experience designing, operating and scaling highly available, resilient and cost-efficient platforms. Proven track record of improving reliability, leading incident response and postmortems, reducing operational toil by 50%, and driving systems-level improvements across multi-region cloud environments.

TECHNICAL SKILLS

- **Reliability:** SLOs, SLIs, Error Budgets, Availability, Capacity Planning
- **Observability:** Prometheus, Grafana, Loki, OpenTelemetry, Datadog
- **Cloud:** AWS (EKS, EC2, S3, RDS, Lambda), Multi-Region, IaC
- **Automation:** Terraform, Ansible, Python, Go (automation/tools)
- **Incident Management:** PagerDuty, Opsgenie, Postmortems (RCA)
- **Containers & Orchestration:** Docker, Kubernetes (EKS)
- **Other:** Linux, Git, CI/CD (GitHub Actions), Networking, Security (IAM)

PROFESSIONAL EXPERIENCE

Senior Site Reliability Engineer | **Mar 2021 – Present**
CloudPilot Technologies, Inc. | Seattle, WA, United States (Hybrid)

- Owned reliability for a global platform serving 20M+ users across 3 AWS regions (EKS), achieving 99.99% availability.
- Led postmortems for 15+ major incidents, driving 30+ permanent fixes and reducing repeat incidents by 72%.
- Cut operational toil by 50% through automation, self-service tooling and runbook standardization.
- Improved system performance by 40% and reduced MTTR from 45 minutes to 12 minutes.
- Established SLOs and error budgets for 25+ critical services, aligning reliability with business and product goals.

Site Reliability Engineer | **Jun 2018 – Feb 2021**
Nimbus Cloud Services | Austin, TX, United States

- Managed and scaled Kubernetes (EKS) workloads for production services, maintaining 99.95%+ availability.
- Built monitoring and alerting (Prometheus + Grafana) and introduced capacity and cost optimization, reducing cloud spend by 28%.
- Automated incident response and recovery, cutting MTTR by 60%.

KEY PROJECTS & IMPACT

1 Reliability & Automation Program
- Built a self-healing platform (auto-restart, auto-scale, and failover), improving availability to 99.99% and cutting toil by 50%.

2 Incident & Postmortem Excellence
- Led a blameless postmortem program, implemented action tracking, and reduced repeat incident rate by 72%.

EDUCATION

BSc in Computer Science | State University (US) | 2016

CERTIFICATIONS

- Google Professional Site Reliability Engineer (SRE)
- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Administrator (CKA)

Key Achievements

- 99.99% platform availability (20M+ users).
- 50% reduction in operational toil.
- MTTR: 45 min → 12 min (↓73%).
- 72% fewer repeat incidents after postmortems.
- 28% lower cloud costs (~$320K/year).

Reliability & Operations

- SLOs & Error Budgets (25+ services)
- Incident Response & RCA
- Postmortems & Action Tracking
- Capacity Planning & Performance
- Automation & Self-Service Platforms

Target Roles

- Senior Site Reliability Engineer
- Principal SRE
- SRE / Platform Reliability Lead
- Production Reliability Engineer
- Infrastructure Reliability Engineer

Cloud Engineer, AWS – Sample Resume

AWS Cloud Engineering | Build | Secure | Operate | Optimize

PARKER COLLINS

Cloud Engineer (AWS)

parker.collins@example.com
+1 (314) 555-7810
St. Louis, MO, United States | Open to Remote
github.com/parkercollins-cloud
linkedin.com/in/parkercollins-cloud

PROFESSIONAL SUMMARY

Cloud Engineer with 3+ years of hands-on experience building, securing and operating scalable workloads on AWS. Skilled in compute, storage, networking, security and automation, with a focus on reliability, cost optimization and operational excellence.

TECHNICAL SKILLS

- **Cloud (AWS):** EC2, S3, RDS, EKS, Lambda, IAM, VPC, CloudWatch
- **Infrastructure as Code:** Terraform, CloudFormation
- **Containers:** Docker, Kubernetes (EKS)
- **CI/CD:** GitHub Actions, Jenkins
- **Monitoring & Logging:** CloudWatch, Prometheus, Grafana
- **Security:** IAM, KMS, Security Groups, WAF
- **Other:** Linux, Bash, Python (automation), Git

PROFESSIONAL EXPERIENCE

Cloud Engineer | **Mar 2023 – Present**
Skyline Cloud Solutions, Inc. | St. Louis, MO, United States (Hybrid)

- Designed and deployed scalable AWS architectures for web applications serving 1M+ monthly users.
- Implemented infrastructure as code (Terraform), reducing provisioning time from hours to ~15 minutes.
- Set up CI/CD pipelines (GitHub Actions) for automated builds and deployments, improving release frequency by 3×.
- Optimized AWS costs by 25% through right-sizing, S3 lifecycle policies and reserved instances.
- Improved system reliability to 99.95% with CloudWatch monitoring, alerts and automated remediation.

Systems Engineer | **Jun 2021 – Feb 2023**
RiverTech Services, LLC | Bellevue, WA, United States

- Managed Linux servers and migrated workloads to AWS (EC2, SB, RDS).
- Automated routine operations with Bash and Python, saving ~6 hours per week.
- Supported network and security configuration (VPC, security groups, IAM) and day-to-day operations.

KEY PROJECTS

1. **AWS Web Application Platform**
   - Built a secure, highly available web platform on AWS (EC2, ALB, RDS, S3) with IaC, monitoring and automated deployment.
2. **Cost Optimization Initiative**
   - Analyzed usage, right-sized resources and implemented S3 lifecycle policies, reducing monthly cloud spend by 25%.

EDUCATION

BSc in Computer Science | State University (US) | 2021

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA)
- AWS Certified Cloud Practitioner (CLF)

Key Achievements

- 99.95% application availability.
- 25% lower AWS cloud costs.
- 3× faster releases with CI/CD.
- Automated infrastructure provisioning (hours → 15 min).

AWS Services Experience

- Compute: EC2, Lambda, EKS
- Storage: S3, EBS
- Database: RDS, DynamoDB
- Networking: VPC, ALB, Route 53
- Security: IAM, KMS, WAF
- Monitoring: CloudWatch

Target Roles

- Cloud Engineer (AWS)
- AWS Platform Engineer
- DevOps / Cloud Engineer
- Site Reliability Engineer (Cloud)
- Infrastructure Engineer (AWS)

Senior Cloud Architect-Leaning Engineer – Sample Resume

Cloud Architecture | Migrations | Cost Optimization | Scale | Reliability

RIVER FORD

Senior Cloud Engineer / Cloud Architect

river.ford@example.com
+1 (312) 555-8964
Chicago, IL, United States | Open to Remote/Hybrid
github.com/riverford-cloud
linkedin.com/in/riverford-cloud

PROFESSIONAL SUMMARY

Senior Cloud Engineer with 8+ years designing, building and operating secure, scalable and cost-efficient cloud platforms. Experienced in cloud architecture, large-scale migrations, cost optimization and reliability engineering on AWS, with a passion for translating business needs into resilient, production-ready cloud solutions.

TECHNICAL SKILLS

- **Cloud (Primary):** AWS – EC2, EKS, ECS, S3, RDS, DynamoDB, Lambda, VPC, IAM, CloudWatch, CloudTrail, Organizations, Cost Explorer
- **Architecture & Design:** Well-Architected, HA, DR, multi-account, landing zone
- **Infrastructure as Code:** Terraform, CloudFormation
- **Containers & Orchestration:** Docker, Kubernetes (EKS)
- **CI/CD:** GitHub Actions, Jenkins, Argo CD
- **Observability & Reliability:** Prometheus, Grafana, AWS CloudWatch, X-Ray
- **Security:** IAM, KMS, WAF, GuardDuty, Security Hub
- **Other:** Linux, Python, Bash, Git

PROFESSIONAL EXPERIENCE

Senior Cloud Engineer
Atlas Digital Services, Inc. | Apr 2021 – Present | Chicago, IL, United States (Hybrid)

- Led the design and implementation of a multi-account AWS landing zone (security, networking, IAM, logging) for 15+ teams.
- Migrated 40+ applications from on-premises to AWS using a phased, low-risk approach, achieving 99.99% availability post-migration.
- Reduced cloud spend by 32% (~$480K/year) through right-sizing, Savings Plans and storage optimization.
- Designed a highly available, auto-scaling platform on EKS, supporting 5M+ monthly users with <300 ms average latency.
- Improved deployment frequency by 4× and reduced change failure rate from 8% to 2% through CI/CD and infrastructure automation.

Cloud Engineer
Pinecrest Tech Solutions | Jun 2018 – Mar 2021 | Austin, TX, United States

- Built and managed AWS infrastructure (EC2, S3, RDS, VPC) for critical business applications.
- Automated infrastructure with Terraform, reducing build/provisioning time from hours to minutes.
- Implemented monitoring and alerting (CloudWatch, Grafana) and established backup and disaster recovery (RPO < 15 min, RTO < 1 hour).

KEY PROJECTS & IMPACT

1 Cloud Migration Program
- Led migration of 40+ workloads to AWS with zero major downtime and 99.99% availability.

2 Cost Optimization Initiative
- Reduced annual cloud spend by 32% (~$480K) through right-sizing, Savings Plans and storage lifecycle policies.

EDUCATION

BSc in Computer Science | State University (US) | 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- AWS Certified DevOps Engineer – Professional

Key Achievements

- Migrated 40+ applications to AWS (99.99% uptime).
- Reduced cloud cost by 32% (~$480K/year).
- Built multi-account landing zone for 15+ teams.
- Scaled platform to 5M+ monthly users (<300 ms).

Architecture & Cloud Scope

- Architecture: HA, DR, scalable, secure
- Migration: On-prem → AWS (40+ apps)
- Cost: Right-sizing, Savings Plans, -32%
- Reliability: 99.99% availability (SLOs)
- Scale: 5M+ monthly users
- Governance: IAM, security, multi-account

Target Roles

- Senior Cloud Engineer
- Cloud Architect
- Principal Cloud Engineer
- Platform Engineer (Cloud)
- Cloud Infrastructure Architect

Azure Cloud Engineer – Sample Resume

Microsoft Azure | Cloud Infrastructure | IaC | DevOps | Security

ELLIOT BROOKS
Azure Cloud Engineer

elliot.brooks@example.com
+1 (425) 555-9081
Seattle, WA, United States | Open to Remote/Hybrid
github.com/elliotbrooks-cloud
linkedin.com/in/elliotbrooks-cloud

PROFESSIONAL SUMMARY

Azure Cloud Engineer with 4+ years of experience building, securing and operating cloud solutions on Microsoft Azure. Skilled in infrastructure as code, automation, monitoring and cost optimization, with a focus on reliability, security and operational efficiency.

TECHNICAL SKILLS

- **Cloud (Primary):** Microsoft Azure (VMs, App Service, AKS, Azure SQL, Storage, Key Vault, Azure Monitor, Entra ID, VNet, NSG, Front Door)
- **Infrastructure as Code:** Terraform, Bicep, ARM Templates
- **Containers & Orchestration:** Docker, Kubernetes (AKS)
- **CI/CD & Automation:** Azure DevOps, GitHub Actions
- **Monitoring & Observability:** Azure Monitor, Log Analytics, Application Insights
- **Security & Identity:** Entra ID (Azure AD), RBAC, Key Vault, Defender for Cloud
- **Other:** Linux, PowerShell, Python, Git

PROFESSIONAL EXPERIENCE

Azure Cloud Engineer | **Mar 2022 – Present**
Vertex Solutions, Inc. | Seattle, WA, United States (Hybrid)

- Designed and deployed scalable solutions on Azure (AKS, App Service, Azure SQL) supporting 1M+ monthly users.
- Automated infrastructure with Terraform and Bicep, reducing provisioning time from hours to <15 minutes.
- Implemented monitoring and alerting with Azure Monitor and Log Analytics, reducing incident MTTR by 55%.
- Optimized cloud spend by 28% (~$220K/year) via right-sizing, reserved instances and lifecycle policies.

Cloud Engineer | **Jun 2020 – Feb 2022**
Pinecrest Technology Services | Houston, TX, United States

- Managed Azure VMs, storage and networking (VNets, NSGs) for business applications.
- Built CI/CD pipelines using Azure DevOps, improving release frequency by 3×.
- Strengthened security with RBAC, Key Vault and Defender for Cloud across dev, test and production environments.

KEY PROJECTS

1. **Azure Kubernetes Platform (AKS)**
   - Deployed a containerized application on AKS with autoscaling, monitoring and zero-downtime deployments.
2. **Azure Cost Optimization Initiative**
   - Analyzed usage, rightsized resources and applied reserved instances, reducing monthly spend by 28%.

EDUCATION

BSc in Computer Science | **State University (US)** | **2019**

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Solutions Architect Expert (AZ-305)

Key Achievements

- 1M+ users on Azure with 99.95% availability.
- 55% faster incident resolution (MTTR).
- 28% cloud cost reduction (~$220K/year).
- 3× increase in release frequency with Azure DevOps.

Azure Services Experience

- Compute: VMs, AKS, App Service
- Data: Azure SQL, Storage, Cosmos DB
- Networking: VNet, NSG, Front Door
- Security: Entra ID, Key Vault, Defender
- Observability: Azure Monitor, Log Analytics, Application Insights
- DevOps: Azure DevOps, GitHub Actions

Target Roles

- Azure Cloud Engineer (Mid-Level)
- Cloud Platform Engineer
- DevOps Engineer (Azure)
- Infrastructure Engineer (Cloud)
- Cloud Solutions Engineer

Platform Engineer – Sample Resume

Internal Platforms as Products | Adoption | Golden Paths | Developer Experience

RIVER FORD
Platform Engineer

river.ford@example.com
+1 (425) 555-7642
Seattle, WA, United States | Open to Remote/Hybrid
github.com/riverford-platform
linkedin.com/in/riverford-platform

PROFESSIONAL SUMMARY

Platform Engineer with 5+ years of experience building and operating internal developer platforms at scale. Treats platforms as products, focused on developer experience, reliability and self-service. Experienced in building golden paths, platform APIs, CI/CD, Kubernetes and cloud to increase engineering productivity and delivery speed.

TECHNICAL SKILLS

- **Platform Engineering:** Internal Developer Platforms (IDP), Backstage
- **Containers & Orchestration:** Docker, Kubernetes (EKS/AKS), Helm
- **Automation & IaC:** Terraform, Pulumi, GitOps (Argo CD), Ansible
- **CI/CD:** GitHub Actions, GitLab CI, Jenkins
- **Observability:** Prometheus, Grafana, Loki, OpenTelemetry
- **Cloud:** AWS (EKS, S3, IAM), Azure (AKS, Key Vault), GCP (GKE)
- **Other:** Python, Go (tooling), Linux, APIs, SRE practices, DevEx metrics

PROFESSIONAL EXPERIENCE

Platform Engineer | **Mar 2022 – Present**
CloudForge Technologies, Inc. | Seattle, WA, United States (Hybrid)

- Built and evolved an internal developer platform (IDP) serving 600+ engineers across 30+ product teams.
- Designed golden paths (templates, CI/CD, IaC, observability) that reduced new service setup time from 3 days to 30 minutes (–83%).
- Increased platform adoption from 45% to 92% within 6 months through self-service, documentation and enablement.
- Improved deployment frequency by 4× and reduced change failure rate from 8% to 2%.
- Implemented cost visibility and guardrails, reducing cloud spend by 28% (~$420K/year).

DevOps Engineer | **Jun 2019 – Feb 2022**
Summit Software LLC | Austin, TX, United States

- Built CI/CD pipelines and containerized services on Kubernetes (EKS), reducing release time from hours to minutes.
- Automated infrastructure with Terraform and improved system observability with Prometheus and Grafana.
- Supported platform automation and reliability, achieving 99.9% service availability.

KEY PROJECTS & IMPACT

1. **Internal Developer Platform (IDP)**
   - Built a self-service platform with Backstage, Kubernetes and GitOps, used by 600+ engineers (92% adoption).
2. **Engineering Golden Paths**
   - Created standardized service templates (API, web, data) with CI/CD, IaC and observability, cutting time-to-production by 83%.

EDUCATION

BSc in Computer Science | **State University (US)** | **2018**

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- HashiCorp Certified: Terraform Associate
- AWS Certified DevOps Engineer – Professional

Key Achievements

- 92% platform adoption (600+ engineers).
- 83% faster service setup (3 days → 30 minutes).
- 4× higher deployment frequency.
- 28% lower cloud spend (~$420K/year).
- Change failure rate: 8% → 2%.

Platform Highlights

- Internal Developer Platform (IDP)
- Golden Paths (service templates)
- Self-Service (CI/CD, IaC, Environments)
- Multi-Cloud (AWS, Azure, GCP)
- Observability & Reliability (SLOs)
- Cost Optimization & Guardrails

Target Roles

- Platform Engineer
- Senior Platform Engineer
- Internal Platform Engineer
- Developer Experience (DevEx) Engineer
- Platform Engineering Lead

Kubernetes Engineer – Sample Resume

Kubernetes | GitOps | Containers | Reliability | Production

RIVER FORD
Kubernetes Engineer

river.ford@example.com
+1 (206) 555-7834
Seattle, WA, United States | Open to Remote/Hybrid
github.com/riverford-k8s
linkedin.com/in/riverford-k8s

PROFESSIONAL SUMMARY

Kubernetes Engineer with 5+ years of experience designing, operating and scaling containerized platforms in production. Strong in Kubernetes (EKS/AKS/GKE), GitOps, CI/CD, observability and reliability, with a focus on secure, cost-efficient and highly available platforms.

TECHNICAL SKILLS

- **Kubernetes:** EKS, AKS, GKE, kubeadm, Helm, Kustomize
- **GitOps & CI/CD:** Argo CD, Flux, GitHub Actions, Jenkins
- **Containers & Images:** Docker, OCI, ECR, ACR, GCR
- **Observability:** Prometheus, Grafana, Loki, OpenTelemetry
- **Reliability:** HPA, VPA, PDB, probes, rolling/blue-green, canary
- **Security:** RBAC, OPA/Gatekeeper, network policies, image scanning
- **Infrastructure as Code:** Terraform, Helm, Kustomize
- **Other:** Linux, Bash, Python, Go (basic), YAML, API integration

PROFESSIONAL EXPERIENCE

Kubernetes Engineer
CloudScale Systems, Inc. | Mar 2022 – Present | Seattle, WA, United States (Hybrid)

- Operate and scale multi-cluster Kubernetes platform (EKS and GKE) serving 2M+ daily requests across multiple environments.
- Implemented GitOps with Argo CD, standardizing deployments for 30+ microservices and reducing release time from 2 hours to 20 minutes.
- Improved platform availability to 99.99% through proper use of HPA, PDB, health checks and proactive capacity planning.
- Reduced infrastructure costs by 24% through right-sizing, autoscaling and workload optimization.

DevOps Engineer (Containers)
Vertex Digital Solutions | Jun 2019 – Feb 2022 | Austin, TX, United States

- Containerized legacy applications and migrated them to Kubernetes (AKS), supporting 15+ business services.
- Built CI/CD pipelines with GitHub Actions and Helm, enabling automated, repeatable deployments.
- Set up monitoring and alerting with Prometheus and Grafana, reducing incident mean time to recovery (MTTR) by 50%.

KEY PROJECTS & IMPACT

1. **Production Kubernetes Platform**
   - Designed and operated a multi-node EKS platform for 2M+ daily requests with 99.99% uptime and auto-scaling.
2. **GitOps Modernization**
   - Introduced Argo CD and Helm for 30+ services, cutting release time by 83% (2 hours → 20 minutes) and improving consistency.

EDUCATION

BSc in Computer Science | State University (US) | 2018

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- AWS Certified DevOps Engineer – Professional

Key Achievements

- Operated 10+ Kubernetes clusters (EKS, GKE).
- 99.99% platform availability.
- 83% faster releases (2 hours → 20 minutes).
- 24% infrastructure cost reduction.
- MTTR reduced by 50%.

Kubernetes Scope

- Clusters: EKS, AKS, GKE (prod)
- GitOps: Argo CD, Flux
- Workloads: Deploy, scale, secure, operate
- Platform: Helm, Kustomize, Operators
- Reliability: HPA, PDB, probes, HA

Target Roles

- Kubernetes Engineer
- Cloud Native Engineer
- Platform Engineer (Kubernetes)
- DevOps Engineer (Kubernetes)
- Site Reliability Engineer (K8s)

DevSecOps Engineer – Sample Resume

CI/CD Security | Vulnerability Management | Compliance | Cloud | Containers

RIVER FORD
DevSecOps Engineer

river.ford@example.com
+1 (206) 555-9047
Seattle, WA, United States | Open to Remote/Hybrid
github.com/riverford-devsecops
linkedin.com/in/riverford-devsecops

PROFESSIONAL SUMMARY

DevSecOps Engineer with 5+ years of experience building secure, automated software delivery pipelines and cloud infrastructure. Expert in integrating security into the SDLC, vulnerability management, container security and compliance, with a track record of reducing security risk and accelerating safe, reliable releases.

TECHNICAL SKILLS

- **DevSecOps & CI/CD:** GitHub Actions, GitLab CI, Jenkins, Argo CD
- **Security & Scanning:** Snyk, Trivy, SonarQube, OWASP ZAP, Checkov
- **Containers & Kubernetes:** Docker, Kubernetes (EKS/AKS), Helm
- **Cloud & IaC:** AWS, Azure, Terraform, CloudFormation
- **Secrets & Access:** Vault, AWS Secrets Manager, IAM, RBAC
- **Observability & Response:** Prometheus, Grafana, CloudWatch
- **Compliance:** CIS Benchmarks, SOC 2, ISO 27001 (practices)
- **Other:** Linux, Bash, Python, YAML, Policy as Code (OPA)

PROFESSIONAL EXPERIENCE

DevSecOps Engineer
CloudForge Technologies, Inc. | **Feb 2022 – Present** | Seattle, WA, United States (Hybrid)

- Built end-to-end secure CI/CD pipelines (GitHub Actions, Argo CD) with automated security gates (SAST, SCA, container and IaC scans).
- Reduced critical and high vulnerabilities by 92% (from 134 to 11) within 3 months through scan-and-fix automation and developer enablement.
- Enforced security and compliance guardrails using policy as code (OPA), RBAC and secrets management (Vault).
- Improved release frequency from bi-weekly to multiple daily releases with zero high-severity issues in production.

Cloud / DevOps Engineer
Vertex Digital Solutions | **Jun 2019 – Jan 2022** | Austin, TX, United States

- Designed and automated infrastructure on AWS using Terraform, with built-in security controls and CIS hardening.
- Containerized applications with Docker and deployed to EKS, integrating image scanning (Trivy) and patch management.
- Set up centralized logging and alerting with CloudWatch and Grafana, reducing mean time to detect (MTTD) by 60%.

KEY PROJECTS & IMPACT

1 Secure CI/CD & Scan-and-Fix Automation
- Integrated SAST, SCA and container scanning into CI/CD, cutting vulnerability backlog by 92% and reducing fix time from 5 days to < 1 day.

2 Cloud Security Hardening & Compliance
- Implemented CIS hardening, least-privilege access and policy as code, enabling SOC 2 readiness and passing security audit with zero critical issues.

EDUCATION

BSc in Computer Science | State University (US) | 2018

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Security Specialist (CKS)

Key Achievements

- **92% reduction in critical & high vulnerabilities (134 → 11).**
- **4× faster, secure releases (bi-weekly → multiple daily).**
- **Zero high-severity findings in production (6+ months).**
- **60% faster threat detection (MTTD: 15 min → 6 min).**

Security & DevSecOps Scope

- **CI/CD:** GitHub Actions, GitLab CI, Jenkins, Argo CD
- **App Security:** SAST, SCA (Snyk), DAST (OWASP ZAP)
- **Container Security:** Trivy, image signing, vulnerability policies
- **IaC Security:** Checkov, tfsec
- **Secrets & Access:** Vault, IAM, RBAC
- **Compliance:** SOC 2, CIS, ISO 27001

Target Roles

- DevSecOps Engineer
- Security-Focused DevOps Engineer
- Cloud Security Engineer
- Platform Security Engineer
- Application Security Engineer
- Site Reliability Engineer (Security)

The Career Switcher – Sample Resume

8 Years of IT Support Rewritten as DevOps Evidence

RIVER FORD
DevOps Engineer
(Career Switcher – IT Support → DevOps)

river.ford@example.com
+1 (206) 555-7812
Seattle, WA, United States | Open to Remote/Hybrid
github.com/riverford-devops
linkedin.com/in/riverford-devops

PROFESSIONAL SUMMARY

IT professional with 8+ years of hands-on support and systems administration experience, successfully transitioning into DevOps. Combines a strong foundation in infrastructure, troubleshooting and operations with modern DevOps skills in automation, CI/CD, containers and cloud to build reliable, secure and scalable systems.

TECHNICAL SKILLS

- **DevOps & Automation:** Git, GitHub Actions, Jenkins, Terraform, Ansible
- **Containers & Orchestration:** Docker, Kubernetes (EKS/AKS)
- **Cloud:** AWS (EC2, S3, IAM, VPC, CloudWatch), basic Azure
- **Monitoring & Observability:** Prometheus, Grafana, CloudWatch
- **Systems & Operations:** Linux (RHEL/Ubuntu), Windows Server, Bash
- **IT Foundations (from Support):** Incident Management, User Support, Active Directory, Networking (DNS, DHCP), Backups, Patch Management

PROFESSIONAL EXPERIENCE

DevOps Engineer (Transition Role) — **Mar 2024 – Present**
NorthRiver Technology, Inc. — Seattle, WA, United States (Hybrid)

- Automated infrastructure provisioning with Terraform on AWS, reducing environment setup time from 2 days to < 2 hours.
- Built CI/CD pipelines (GitHub Actions) for 10+ applications, cutting release time by 75%.
- Containerized legacy applications with Docker and deployed to EKS, improving availability to 99.95%.
- Implemented monitoring and alerting with Prometheus and Grafana, reducing incident detection time by 60%.

IT Support / Systems Administrator | **Jan 2016 – Feb 2024**
NorthRiver Technology, Inc. — Seattle, WA, United States

- Provided Tier 2/3 support for 1,000+ users (Windows, Linux, network and application support) with 98%+ satisfaction.
- Managed servers, patching, backups and core infrastructure, ensuring business uptime of 99.9%.
- Wrote automation scripts (Bash/PowerShell) to handle recurring tasks, reducing manual effort by ~50%.
- Supported cloud adoption by migrating key workloads to AWS (EC2, S3), working with the DevOps team.

KEY PROJECTS & IMPACT

1 IT Support to DevOps Modernization
- Migrated a traditional, manually managed application to a containerized CI/CD pipeline (Docker, GitHub Actions, EKS), improving release speed by 75% and stability to 99.95%.

2 Infrastructure as Code (IaC) Foundation
- Created reusable Terraform modules for common AWS resources (VPC, EC2, RDS, IAM), reducing provisioning time from days to minutes.

EDUCATION

BSc in Information Technology | State University (US) | 2015

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
- Docker Certified Associate (DCA)
- Certified Kubernetes Administrator (CKA)

Career Transition Proof

- 8+ years in IT support & systems operations.
- Applied existing skills to DevOps: automation, cloud, CI/CD, containers.
- Real projects with measurable impact (↑ speed, ↑ uptime, ↓ manual work).
- Production experience (99.95% availability).

From Support to DevOps

- User & system support → operational reliability (SLOs)
- Server management → IaC (Terraform)
- Manual deployments → CI/CD automation
- Troubleshooting → observability (Prometheus, Grafana)
- On-prem support → cloud (AWS, EKS)

Target Roles

- DevOps Engineer (Entry/Mid)
- Cloud Operations Engineer
- Site Reliability Engineer (Junior)
- Platform Engineer (Early Career)
- Infrastructure Engineer (Cloud)

The Contractor – Sample Resume

Independent DevOps/SRE Contractor | Short Engagements, Big Outcomes

RIVER FORD
DevOps / SRE Contractor
(Independent Consultant)

river.ford@consultmail.com
+1 (206) 555-9407
Seattle, WA, United States | Available for Contract
github.com/riverford-consulting
linkedin.com/in/riverford-consulting

PROFESSIONAL SUMMARY

Results-driven DevOps/SRE contractor with 7+ years of experience delivering high-impact, short-term engagements for startups and enterprises. Specializes in cloud infrastructure, CI/CD, Kubernetes, reliability, cost optimization and platform automation, with a track record of delivering measurable outcomes within tight timelines.

CORE SKILLS

- **Cloud:** AWS, Azure (core), GCP (basic)
- **Infrastructure as Code:** Terraform, Bicep
- **Containers & Orchestration:** Docker, Kubernetes (EKS/AKS)
- **CI/CD & Automation:** GitHub Actions, GitLab CI, Jenkins
- **Observability & Reliability:** Prometheus, Grafana, CloudWatch
- **SRE & Performance:** SLOs, incident response, capacity, scaling
- **Security & Compliance:** IAM, RBAC, secret management, scanning
- **Scripting & Tools:** Python, Bash, Helm, Kustomize

SELECT CONTRACT ENGAGEMENTS (RECENT)

1 **Platform Modernization (3 Months) | SaaS (US, Remote)**
- Containerized legacy services, implemented CI/CD and moved to Kubernetes (EKS).
- **Result:** Deployment time ↓ 70% (from ~1 hour to < 20 minutes) and environment provisioning ↓ from days to < 1 hour.

2 **Reliability & Cost Optimization (2 Months) | E-commerce (EU)**
- Improved system reliability, added monitoring/alerting and rightsized cloud resources.
- **Result:** Uptime ↑ to 99.99% and cloud spend ↓ 32% (~$48K/year).

3 **Secure CI/CD Implementation (1 Month) | Fintech (US)**
- Built secure CI/CD with SAST/DAST, image scanning and policy gates.
- **Result:** Reduced critical vulnerabilities by 90% and accelerated release cycles by 3×.

OTHER NOTABLE ENGAGEMENTS

- Kubernetes cluster setup & workload migration (6 weeks) – Startup (US).
- Disaster recovery & backup strategy (4 weeks) – Healthcare (US).
- Infrastructure automation with Terraform (8 weeks) – Enterprise (Remote).

EDUCATION

BSc in Computer Science | State University (US) | 2016

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Administrator (CKA)
- HashiCorp Certified: Terraform Associate

Key Outcomes (Across Contracts)

- 5+ successful short-term engagements (1–3 months).
- Average deployment time reduced by 70%.
- Cloud costs cut by 20–40% across clients.
- Uptime improved to 99.99%.
- Security findings reduced by up to 90%.

What I Bring

- Fast ramp-up and delivery.
- Hands-on, production focus.
- Measurable, business-aligned outcomes.
- Clean documentation and knowledge transfer.
- Remote and time-zone flexible.

Engagement Types

- Platform/Infrastructure Setup
- CI/CD & Release Automation
- Kubernetes (Build, Migrate, Scale)
- SRE & Reliability Improvements
- Cloud Cost Optimization
- Security & Compliance Automation

Anatomy of a Resume Bullet Point

The Formula for High-Impact, Recruiter-Ready Bullets

The Proven Formula

Verb + System + Scale + Result

Verb + **System** + **Scale** + **Result**

- **Verb:** Action you took (e.g., Built, Automated, Reduced)
- **System:** What you worked on (e.g., CI/CD, Kubernetes, AWS)
- **Scale:** The scope or size (e.g., 50+ services, 10K users)
- **Result:** The measurable impact (e.g., 80% faster, 99.99% uptime)

Strong Action Verbs (Use These)

- Built, Designed, Implemented
- Automated, Orchestrated, Integrated
- Migrated, Optimized, Scaled
- Reduced, Improved, Increased
- Secured, Standardized, Established
- Led, Drove, Delivered

Why It Works

- Shows what you did (action).
- Proves technical depth (system).
- Gives context and size (scale).
- Demonstrates impact and business value (result).

Quick Tips

- Use numbers and real metrics.
- Be specific (name tools, systems, or platforms).
- Show outcomes (speed, cost, reliability, security).
- Keep it concise (1–2 lines per bullet).
- Tailor to the role and job description.

Five Real-World Before/After Rewrites

1

Before (Weak)
✗ Worked on CI/CD pipelines.

After (Strong – Formula Applied)
✓ Built and automated CI/CD pipelines (GitHub Actions) for 20+ services, reducing release time by 75%.

2

Before (Weak)
✗ Managed Kubernetes clusters.

After (Strong – Formula Applied)
✓ Operated and scaled Kubernetes (EKS) clusters for 10+ applications, achieving 99.99% availability.

3

Before (Weak)
✗ Improved system performance.

After (Strong – Formula Applied)
✓ Optimized infrastructure (AWS, Terraform) for 50+ workloads, cutting cloud costs by 32% (~$480K/year).

4

Before (Weak)
✗ Worked on security and compliance.

After (Strong – Formula Applied)
✓ Implemented security scanning (Snyk, Trivy) and policy gates in CI/CD, reducing critical vulnerabilities by 90%.

5

Before (Weak)
✗ Supported and maintained production systems.

After (Strong – Formula Applied)
✓ Monitored and maintained production systems (Prometheus, Grafana) across 30+ services, reducing MTTR from 45 minutes to under 10 minutes.

Key Takeaway: A great resume bullet is not just what you did, but the impact it created.

10-Point Resume Checklist

1. Clear, targeted job title.
2. Strong, outcome-focused summary (3–4 lines).
3. Relevant technical skills (tools, cloud, automation, etc.).
4. Action + system + scale + result in experience bullets.
5. Real projects with measurable impact.
6. Education listed (degree, school, year).
7. Key certifications (relevant and current).
8. Clean, 1-page, easy to scan layout.
9. Includes GitHub/portfolio (where applicable).
10. ATS-friendly (simple formatting, no graphics in the text area).

Target Roles (Examples)

- DevOps Engineer
- Cloud Engineer (AWS/Azure/GCP)
- Platform Engineer
- Site Reliability Engineer (SRE)
- Kubernetes Engineer
- DevSecOps Engineer
